project experience

Mainnet forking

- Started an instance of Hardhat Network that forks mainnet.
- Simulated the same state as mainnet, it worked as a local development network.
- Interacted with deployed protocols and test complex interactions locally.

Smart Contract productivity using Hardhat + Tenderly

- Integrated Tenderly with local Hardhat installation
- Debug, add, and monitor contracts with Tenderly in seconds.

Py-EVM

- Building an app that uses Py-EVM
- Creating a chain with custom state
- Understanding the mining process

Education

2016 - 2020

Chung Yuan Christian University

Bachelor's Degree

Information Management
